

## *Research Assistantship Available*

### Professor Mike Johnson

### Speech and Signal Processing

A Graduate Research Assistantship is currently available in the UK ECE Speech and Signal Processing lab for work related to speech and signal processing. Specific projects include speech recognition technology for acoustic-to-articulatory inversion, with application to problems such as Computer-Aided Language Learning (CALL) and Computer-Aided Pronunciation Training (CAPT).

This twelve-month position includes tuition reimbursement as well as a bi-weekly stipend of \$900 (annual \$23,400). Candidates should have a Bachelors or Masters degree, with background in signals and systems and signal processing. Strong undergraduate students who will be graduating in May 2018 are eligible to apply.
